ELECTRIC TOWING UNIT

Canadian
Electric
Vehicles Ltd.

Might-E Tug...a multi-purpose electric towing unit designed to move a variety of carts, bins and equipment.

With available Standard Duty and Super Duty models Might-E Tug has a pulling capacity of 2,000 to 7,000 pounds.

The Might-E Tug is a high torque towing device capable of operating up to 72 hours on a single charge.

Recharge is as simple as plugging into a standard outlet.

Powered by a battery pack the Might-E Tug is a zero emission unit safe to use in enclosed areas.

The Might-E Tug is ergonomically designed for ease of operation and greatly reduces the potential for operator injury by eliminating the effort of moving heavy loads.

Designed for low maintenance cost, it out performs larger ride-on tow units both financially and mechanically.
